# **SKY-WALK TENSION WIRE GRID**

Skywalk Tension Wire Grid enables technician and engineer to work with a secure virtual floor. It will eliminate the usage of scaffold when doing installation or maintenance to the lighting and any up-stage equipment. The designs of Skywalk Tension Wire Grid make it unseen from ground level or from stage area, without shade from lighting, and can support high load capacity.

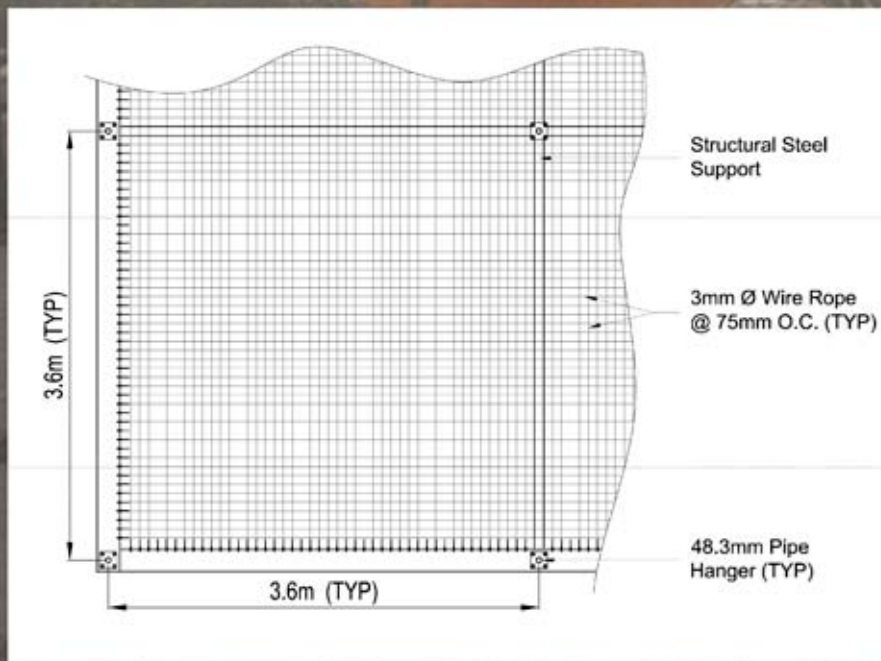

Skywalk Tension Wire Grid provides lighting and up-stage equipments requirement for different configurations. Technician and engineer can quickly adapt to working on the Tension Wire Grid without any disturbance from the stage.

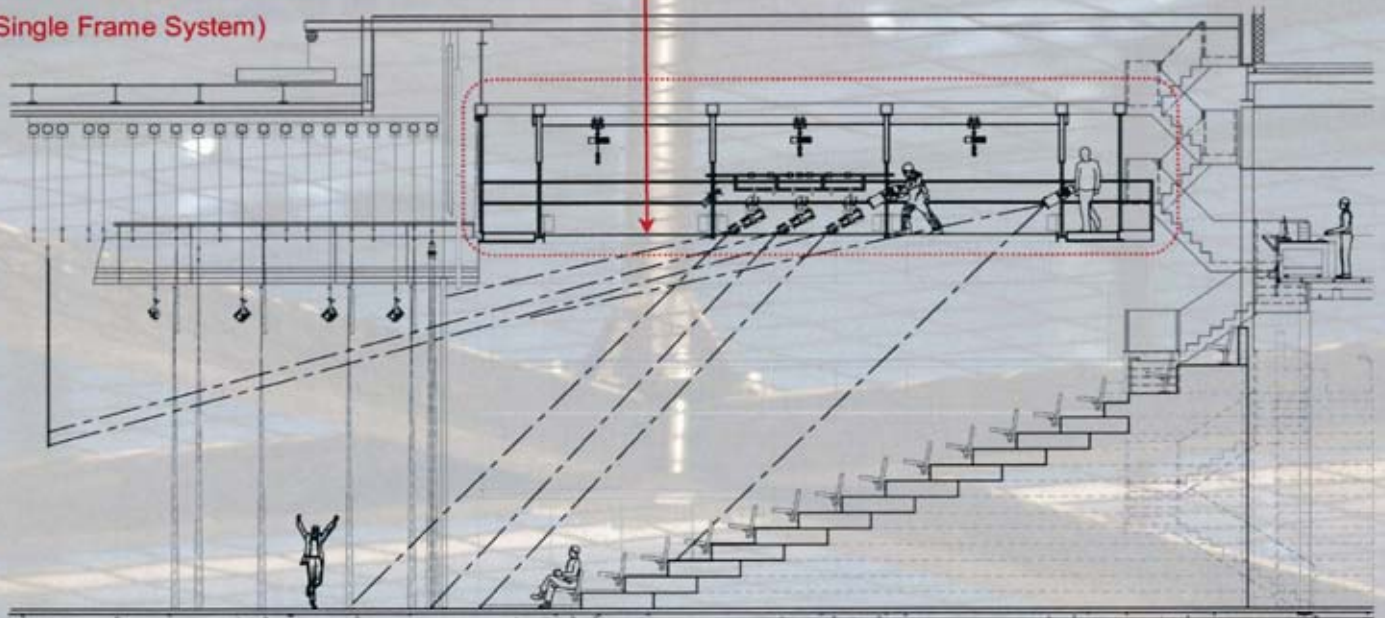

# SKY-WALK TENSION WIRE GRID

## FEATURES

- Provides walking surface over performance area allowing lighting from overhead without shadows.
- Provides safe access to overhead positions.
- Maximizes flexibility in locating lighting and rigging
- Drop spot lines through the mesh anywhere.
- Saves man hours and storage space.
- Makes heights accessible without lifts or scaffolding.
- Custom sizes and/or shapes to fit building support systems.
- High load capacity designed to handle both equipment and technicians.

Tension Wire Grid  
(Single Frame System)
